

The Progress Company Platform & Product Availability Guide

Update: **September 9th, 2004**

The Platform & Product Availability Guide reflects the current commercial releases for the Progress Company's products. This document does NOT address future product release plans. The information contained in this document is updated on a regular basis and is subject to change without notice. Please note: Edits made since **September 2nd 2004** have been consolidated with new changes shown in red, bold font.

Update Summary

- **Update Summary has been updated to reflect Service Pack requirements for Fathom Management and updates to the support for WinXP SP2**
- **Fathom Management 3.0A (Standard Edition) is now available for Progress V9.1D**
 - **Fathom Management 2.1A Life Cycle status changed from 'Active' to 'Functionally Stable'**
 - **Fathom Management 2.0A & 1.0A Life Cycle status changed from 'Mature' to 'Retired'****The Progress V9.1D09 ServicePack is required**
- **The Life Cycle status of all v9.1C DataServer products have changed from 'Mature' to 'Retired'**

PRODUCT NAME	PRODUCT CODE
Progress/400 DataServer	0253
Progress/400 Native Compiler	0276
Progress/400 AppServer	0320

V5R3 DB2/400 has not been certified and is not supported by any of the Progress/400 products
Please refer to the Progress Product Life Cycle document for life cycle definitions
<http://www.progress.com/products/lifecycle/index.ssp>
- **Windows XP Service Pack 2 is currently under review – Problems related to the WinXP SP2 have been reported for Progress V9.1D (and OpenEdge 10B) and so it is recommended that the WinXP SP2 not be used for Progress (and OpenEdge) environments**

Progress Version 9 Notes:

- (1) Refer to the Progress Product Life Cycle document for life cycle definitions.
- (2) Unless otherwise noted, all clients support Progress networking for DataServers.
- (3) Progress V9 on HP-UX 11 (32-bit) runs on the HP-UX 11 operating system (32-bit or 64-bit).
- (4) Progress V9 on Sun Solaris SPARC (32-bit) runs on the Solaris SPARC operating system (32-bit or 64-bit).
- (5) No SQL-92 RDBMS on DG/UX Intel, SCO OpenServer & Solaris Intel platforms.
- (6) Only client and development products available on this platform (development servers not available)
- (7) Windows XP (Home & Professional Editions) is for client and development products. Microsoft does not provide server versions of Windows XP
- (8) No support for SQL92 DBMS triggers via stored procedures
- (9) Minimum OS for Oracle 9i support is Compaq Tru64 Release 5.0
- (10) Oracle environment variable ORASOPATHNAME needs to be set due to differences between Oracle 8 and 9 installations
- (11) United Linux V1.0 covers the following Linux Intel distributions: Caldera Linux Server 4.0, SuSE Enterprise Server 8, Turbo Linux 8 and Conectiva Linux 8
- (12) No native SQL92 client on DG/UX Intel, CompaqTru64, SCO OpenServer, SCO UnixWare, SCO OpenUnix & Solaris Intel platforms
- (13) Registered products of the UNIX® 98 Open Group are supported <http://www.opengroup.org/>. Membership details <http://www.opengroup.org/openbrand/register>
- (14) HP-UX 11i (11.1) OS Patch PHSS_24638 recommended for Progress ServicePack and Fathom installations
- (15) The PROBUILD functionality does not work under the RHEL 3.0 environment and therefore is not supported. Possible alternatives for customers needing to PROBUILD Progress binaries/executable are:
 - 1) Upgrade to OpenEdge 10.0A01 (supports RHEL 3.0 & JVM 1.4)
 - 2) PROBUILD under the Red Hat Enterprise Linux 2.1 environment (resultant binaries can be deployed under RHEL 3.0)
 - 3) The necessary changes needed to support PROBUILD under RHEL 3.0 requires a full Progress Maintenance Release. The next V9.1 Maintenance Release (V9.1E) is currently scheduled to be available in the fourth calendar quarter of 2004.

Progress Version 9 OpenEdge Notes:

- (1) For DataServer and Third Party product availability by Platform, refer to the Progress Version 9 Platform Availability tables.
- (2) Application Debugger is NOT available on DG/UX Intel, Linux Intel or 64-bit platforms (Tru64 Unix, HP).
- (3) No SQL-92 available on DG/UX Intel, SCO OpenServer & Solaris Intel platforms.
- (4) SQL Client Access is NOT available on DG/UX Intel, SCO UnixWare, SCO OpenServer & Solaris Intel platforms.
- (5) Requires an NT or UNIX Development Server license
- (6) The availability of PeerDirect Products is region specific, please contact your local Progress sales office for more details
- (7) For details regarding which variant of Windows or Unix operating system is available please refer to the section titled 'Progress Version 9 Platform Availability'
- (8) Not available for the following Microsoft operating systems Win 95, 98, ME, XP Home
- (9) Product includes a limited test and development runtime environment, supporting approximately 5-users.
- (10) Product includes a limited test and development runtime environment, supporting approximately 20-users.
- (11) Products with underscores product codes are restricted to environment containing Progress RDBMS and/or Progress DataServer
- (12) Progress V9.1D will be the last major Progress release to support SQL89 access. Customers should migrate to the SQL92 access products.
